The Best is Still To Come

Toes in the sand; Mind engaged

Coaches Corner

Where did the month of June go? I feel like I just blinked, and it was July.

I (Patty) attended the Costa Rica International Living Event with Winton and Barefoot Consultants from June 22 to June 26. It was a great event. There were two other certified independent Barefoot Consultant

Coaches there with me, along with Winton and one coach in training. It was a fun event.

There are a lot of people interested in both moving abroad and freelancing. Usually, at these events, when I ask people if this is their first event, they answer no, this is my 3rd, 4th, and so on. This time when I asked the question, I got a lot of replies saying this was their first time.

That tells me there are a lot more people now interested in learning about moving abroad and freelancing.

I know COVID was not the greatest thing to happen to the world, but I do think it was great in opening the eyes of employers and letting them know people can be productive, sometimes more productive working from home thanks to Covid, I think we are going to see the number of freelancers exploding.

It is time to make sure you are ready to take advantage of this and become the best freelancer you can be!

Welcome!!

Welcome to our July Newsletter!

And welcome to the "Dog Days of Summer!"

This is the time that you either want to be laying under an umbrella at a pool or the beach enjoying the outside and soaking up some of that natural Vitamin D.

Well, guess what - you can do that AND still be working on your laptop and earning some money! That is one of the joys of freelancing! Being able to work from where you want and when you want!

If you still aren't on the freelance bandwagon - and want to be - contact me and Robert at info@rptvirtualsevices.com and we can show you how to get started!

AI: Friend or Foe for Freelancers

The rapid advancement of technology, in particular artificial intelligence (AI), seems to

have sparked concerns among many freelancers. However, instead of fearing AI, freelancers should recognize the numerous benefits AI brings to their work.

Freelancers should view AI as a valuable ally rather than a threat. Freelancers can harness AI's power to boost efficiency, explore new opportunities, unleash creativity, deliver personalized experiences, and gain data-driven insights. Rather than looking at the rise of AI as a negative, freelancers should adapt, learn, and leverage this transformative technology to stay competitive and thrive in the rapidly evolving freelance landscape.

Through a symbiotic relationship with AI, freelancers can optimize their productivity, offer higher-quality services, and unlock a world of new possibilities.

Let's look at a few ways AI can aid freelancers who offer writing as one of their services:

- 1. AI tools can help freelancers generate ideas, provide topic suggestions, and even offer sentence and paragraph rephrasing to enhance the overall quality of the writing.**
- 2. AI tools can assist freelancers in refining their language skills by suggesting vocabulary improvements, offering alternative word choices, and providing grammar suggestions.**
- 3. AI-powered plagiarism checkers can quickly scan written content to ensure it is original and free from any unintentional plagiarism issues.**
- 4. AI can help freelancers optimize their writing for search engines (SEO) by suggesting relevant keywords, analyzing keyword density, and providing guidance on content structure.**
- 5. AI algorithms can summarize lengthy articles or documents, saving freelancers time and effort by providing concise and digestible summaries.**
- 6. AI-powered translation tools can help freelancers overcome language barriers by quickly translating content into different languages, expanding their potential client base.**
- 7. AI-based project management tools can assist freelancers in organizing their workload, setting deadlines, and tracking progress, ensuring efficient time management.**

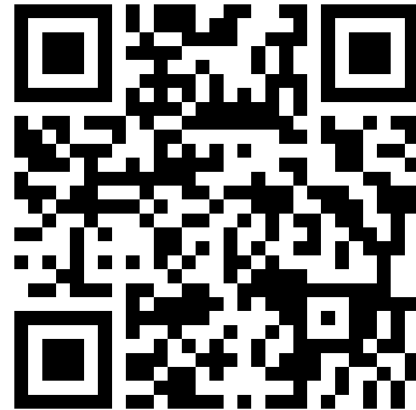

These are just some of the ways AI can benefit freelance writers.

It is important to remember, however, that while AI can be a valuable tool for freelancers, it is important to use it as an aid or a tool and not rely solely on automated solutions. Human creativity, critical thinking, and personal touch
